# The Meaning of Eider Rock

## EIDER ROCK

We have chosen the name Eider Rock for the proposed second Saint John refinery project because of what the name represents for our community and for our company.

The Eider is a marine duck native to this region. Unlike most ducks, this hardy duck does not migrate each season. The Eider remains at home, near the sea, through the winter. Eider ducks watch out for each other, and huddle closely together in harsh weather to keep warm and dry. When Eiders take to the skies, they move as one.

The Eider represents the aspirations and commitment of our community to stay here and grow together. The Eider also represents our community's resilience, industriousness, and nurturing qualities.

The Rock provides a safe place for the Eider to rest and grow. The Rock represents our community's strength, permanence, and a solid foundation on which to grow together.

Together, Eider Rock represents our natural habitat and our quality of life.
