

Hand Sanitizer

Kills harmful bacteria and germs.

Our blend

When soap and water are unavailable, you can count on our Hand Sanitizer blended with a 73% Isopropanol base and glycerin moisturizer. This formulation was specifically designed to help fight harmful bacteria and viruses.

Operational excellence

Our Hand Sanitizer is produced in Saint John, New Brunswick, at our world-class, 157,000-square-foot ISO-certified blending and packaging facility, which includes a state-of-the-art laboratory. Since we produce more than 2,300 finished SKUs for distribution around the globe, you can be confident we know what we are doing. To produce our Hand Sanitizer, we have reconfigured our operation to all government regulatory and manufacturing processes required to ensure a quality, safe and effective product.

A focus on quality

Quality control – All our products are quality tested from raw materials to finished packaged goods. We have the latest North American certifications and industry approvals. Our products are backed by one of the most robust quality statements in the industry.

A team on your side

Customer focus – Our commitment to you is a part of who we are as a company. Since 1924, customer focus has been one of our guiding principles. We build trusting relationships and respond to your needs quickly and respectfully.
