

Disinfectant Spray 946 mL

Reliable supply to meet your needs.

Reliable supply – made in Canada

Produced at our blending and packaging plant in Saint John, New Brunswick, we control all aspects of the product manufacturing process. We have a solid supply chain and a local team committed to getting you the products you need, when you need them.

Licensed by Health Canada

The Drug Identification Number (DIN) identifies that our disinfectant spray is licensed by Health Canada and meets all of the licensure requirements.

Quality formula

Our disinfectant spray is specifically designed for use on non-porous, hard surfaces to kill a broad spectrum of bacteria, fungus and viruses. All our products are tested from raw material to finished packaged goods and we adhere to the most robust quality standards in the industry.

Responsive customer service

Our strong commitment to our customers has been the way we have done business since 1924. We keep our promises to our customers and are always available when you need us.
