

Rockdrill

Extreme Pressure Oil

Features & benefits

- Extreme pressure (EP) protection against scuffing and seizure
- Rust and corrosion protection
- Excellent adhesiveness
- Low stray mist levels
- Five grades available for use at various operating temperatures

Rockdrill oils are blended from high-quality paraffinic base oils and formulated with tackifier, antirust, and extreme pressure (EP) additives.

Rockdrill oils are formulated with an emulsifying agent designed to maintain lubricant film thickness, providing a protective barrier against rust and corrosion when in contact with water.

Rockdrill oils are blended with an added tackifier for oils to adhere to metal surfaces, provide a sufficient lubricant film and help reduce oil consumption and waste.

Rockdrill oils are recommended in the following applications:

- Pneumatic drills
- Jumbo drills
- Jackhammers
- Small air tools
- Airline oilers

Rockdrill oils can also be used in slideway and chain applications where a premium adhesive lubricant is required under wet conditions.
